

Retail Price List 2019 / 2020

Welcome to our 2nd price list, we've kept it simple and just listed our trees by name rather than including descriptions which can be viewed online on our web site.

The weather this year has been generally kinder although late frosts have kept some trees back, we've had rain this year for a change but the ground is still generally very dry so trees will need regular watering.

All our trees were grafted in the Netherlands at the De Smallekamp Nursery <https://www.desmallekamp.nl> and as last year we have selected a range of Walnuts, Heartnuts and a few Hicans that complement each other and bring to the UK many selected choice cultivars not available here before. Some of these we already grow and some are new to us as well but come highly recommended for our conditions in the South Midlands. Many varieties of walnut will also grow up into the north of England and Scotland but they need to be sited carefully, all of them hate wet feet so good drainage is key and even those classed as resistant to walnut blight don't like very wet regions.

All our trees are pot grown and arrived in 2L pots but most will be potted on into 6/7.5 litre root pruning air pots which they will start to fill this year. We offer a mail order service and it is priced per parcel of 1 tree but we can remove pots in some cases for smaller trees and get several in one box if required to save carriage.

Local collection (CV36 5AR) by appointment (Tom Tame 07816 674854) is our preferred option as there is no chance of any damage or loss in transit, we also save the packaging (and the planet) and we get to meet others interested in walnuts! We can also deliver locally if required at 50p per mile within 20 miles.

Existing stock trees are available now new trees from mid July and prices are valid until 1st April 2020.

Delivery

We use Fedex for mail order, trees are normally 1 per box unless requested otherwise. Pots are secured in the box and contained in a large plastic bag to prevent leaks. We book collections as we need them so allow 48 hours for despatch please.

Eco 2-3 day £8.50 per consignment for 1st box, subsequent boxes £5

Next day £10.00 per consignment for 1st box, subsequent boxes £6

Any damage to a parcel must be notified on the delivery ticket and if possible, a photo taken at the same time.

Trees should be unpacked and watered the same day, we don't send them dry, but they will appreciate the drink.

This year we don't have large numbers of some cultivars but can order anything from De Smallekamp's range for the 2020 grafting season (by October 2019). We will be pre-ordering the trees we want at the same time so if there is something you've seen in their range please contact us.

Walnuts

Grafted <i>Juglans regia</i> cultivars	Small £28.50 & Large £38.00 or £42 (Dwarf trees)
Aufhauser Baden, Rote Linzer & Sychrov	Red Kernel * Limited stock *
