

## Retail Price List 2021 / 2022

Welcome to our new price list, we've kept it simple and just listed our trees by name rather than including descriptions which can be viewed online on our web site.

Another different year, imports are now more expensive as every delivery from Europe needs a Phytosanitary Certificate which has proven more difficult for the exporting suppliers this year.

Trees are grafted by small specialist suppliers in the Netherlands for Heartnuts, Carya, Red Walnuts and some specialist Walnuts and Juglans. The commercial orchard varieties mostly come from Bulgaria and are either pot grown (Deep bag pots) or Bare-Rooted in the winter for the large quantity commercial cultivars. The majority of our trees are usually pre-ordered but with the change in customs and inspections we will probably carry more pot grow stock in the future.

We offer a mail order service and it is priced per parcel (nominally 1-3 trees depending on pot size) but we can remove pots in some cases for smaller trees and get several in one box if required to save carriage. Trees are grafted annually in January so are generally 1<sup>st</sup> or 2<sup>nd</sup> year grafts.

Local collection (CV36 5AR) by appointment (Tom Tame 07816 674854) is our preferred option as there is no chance of any damage or loss in transit, we also save the packaging (and the planet) and we get to meet others interested in walnuts! We can also deliver locally if required at 50p per mile within 20 miles.

Existing stock trees are available now, new potted trees from September, bare-rooted December and prices are valid until 1<sup>st</sup> April 2022.

### **Delivery**

We use Fedex for mail order to the UK mainland, trees are normally 1-3 per box unless requested otherwise. Pots are secured in the box and contained in a large plastic bag to prevent leaks. We book collections as we need them so please allow 48 hours for despatch.

Eco 2-3 day      £9.50 per consignment for 1<sup>st</sup> box, subsequent boxes £5

Next day          £11.50 per consignment for 1<sup>st</sup> box, subsequent boxes £6

**UK non-mainland, NI, CI, Europe - Unfortunately at the moment we can't export cost effectively as each delivery needs to be inspected and charges make this too expensive unless there is a pallet of trees.**

***Any damage to a parcel must be notified on the delivery ticket and if possible, a photo taken at the same time.***

***Trees should be unpacked and watered the same day, we don't send them dry, but they will appreciate the drink.***

This year we didn't have a delivery from De Smallekamp's range but should resume next year for the 2021/2 grafting season and will concentrate on their Carya cultivars. We can pre-order for most of their range until October, we also have another Dutch supplier with a very comprehensive range of Red Walnuts and Heartnuts.

Grafting isn't 100% guaranteed though and some items may not be available.

# Warwickshire Walnuts

**\* We generally have less than 20 of most cultivars in stock, some as few as 2-3 \***

## Walnuts – Pot grown

### Grafted Juglans regia cultivars
