

Retail Price List June 2022

Welcome to our new price list, we've kept it simple and just listed our trees by name rather than including descriptions which can be viewed online on our web site.

We've started doing some grafting ourselves now but trees aren't available yet, mostly due to lack of scion wood as our trees establish. Imports from Europe cost more every year and the small independent Dutch nurseries we source these hard to find trees from are still struggling to get a Phytosanitary Certificate for one or two pallets.

These small specialist suppliers in the Netherlands graft Heartnuts, Carya, Red Walnuts and some specialist Walnuts and Juglans. The commercial orchard varieties from France, USA etc mostly come from Bulgaria and are either pot grown (Deep bag pots) or Bare-Rooted and lifted early in the winter to join trees we've grown on here.

Trees are grafted annually in January-May in northern Europe however in hotter climates they can be grafted in summer so the desert nuts are often a year older, hence their size when we receive them.

Existing stock trees are available now, new potted trees from September, bare-rooted December and prices are valid until 1st April 2023.

Delivery

Local collection (CV36 5AR) by appointment (Tom Tame 07816 674854) is our preferred option as there is no chance of any damage or loss in transit, we also save the packaging (and the planet) and we get to meet others interested in walnuts! We can also deliver locally if required at 50p per mile within 20 miles.

We offer a 5% discount for collection of 5 or more trees

We offer a mail order service for **smaller trees only** and it is priced per parcel (nominally 1-3 trees depending on pot size) but we can remove pots in some cases for smaller trees and get several in one box if required to save carriage. We use Fedex for mail order to the UK mainland, trees are normally 1-3 per box unless requested otherwise. Pots are secured in the box and contained in a large plastic bag to prevent leaks. We book collections as we need them so please allow 48 hours for despatch.

Eco 2-3 day £10.50 per consignment for 1st box, subsequent boxes £5.5

Next day £12.50 per consignment for 1st box, subsequent boxes £6.5

UK non-mainland, NI, CI, Europe - Unfortunately at the moment we can't export cost effectively as each delivery needs to be inspected and charges make this too expensive unless there is a pallet of trees.

Any damage to a parcel must be notified on the delivery ticket and if possible, a photo taken at the same time. Trees should be unpacked and watered the same day, we don't send them dry, but they will appreciate the drink.

This year we didn't have a delivery from De Smallekamp's Carya range again due to the lack of suitable rootstocks in Europe but we're hopeful for the 2022/3 grafting season.

We offer a full drying and shelling line for walnut growers and collect from other orchards, we can also handle Hazel/Cobnut drying and shelling.
