

Cultivar	Origin	Red	Common Description (from various sources)	To plant or not?	Bud break	Terminal/Mixed/Lateral	Self Fertile	Protandrous (M)	Protogynous (F)
Alsoszentivani 117 (A-117)	HU		Late leafing, high yielding, large 36mm fruit easily breakable, outstanding growth. Prolonged time to harvest, from mid September to early October. Resistant to diseases. 65% oil	Poor for us so far, we think it flowers too early or maybe just too young yet?	Mid	T	P	Y	
Alsoszentivani Kesei (A117-31)	HU		A117/Pedro cross. Upright fast growing tree, loose canopy, very late budding, highly productive from a young age, large nuts 33-36mm	Good potential, one to watch as it fruits young and seems good in our micro-climate	Very Late	L 25-35%		Y	
Alsoszentivani Bonifac (A117-15)	HU		A117/Pedro cross. Medium slow growth with a dense canopy. Highly productive from a young age, med/large nuts 34mm	Good potential, one to watch as it fruits young and seems good in our micro-climate	Late	L 50%			Y
Apollo	CZ		Large lushly growing tree, early into leaf so frost susceptible. Large Round Nut, good flavour & easy shelled. Jupiter for pollination. Lightly wrinkled shell. 36mm	Much too early into leaf for most of the UK, removed all our trees bar one, no nuts in 6 yrs	very early		P		Y
Broadview	CA		Fruit production at a very early age. Large - good quality Self fertile. Susceptible to walnut blight. From Canada grown from seed from Odessa, Ukraine. 1930	Good reliable cropper, susceptible to blight but with enough ventilation it works, male catkins seem more frost susceptible?	Mid	L	Y	Y	
Buccaneer	NL		Mid-season, good pollinator, large tree. Suitable for pickling. Heavier crop than Broadview, smooth, young cropping.	Very average so far in the UK in our experience, always has nuts but much thinner crop than Broadview.	Mid	L	Y		Y
Chandler	USA		Late leafing Amercian variety about 8 days before Fernor, upright medium sized tree. Large nuts well filled with a pale kernel, partly self-fertile. Thin shell and easy to crack. Grown worldwide and a heavy cropper.	Appears to be a real contender in England, supposedly needs warmer climate but evidence it fruits very well here, planted here	Mid/Late	L 70-80%	P		Y
Dryanovo	Bu		Strong growing dome shaped open tree, leafs out mid season, fairly early flowering. Large nuts (upto 16g) with a lovely colour and taste and high oil content (upto 75%). Sheinovo pollinator	We've one very young tree but like all Buklgarian cultivars seems mid season, we'll see.	Mid	T			Y
Fernette	FR		Large good quality globular nut similar to Fernor (but larger) and a good pollinator for the same variety. Heavier cropping than Franquette	Generally listed as a modern pollinator but crops heavily and well. Good nut and reliable we think.	Late	L	N		Y
Fernor	FR		A moderate growing French variety,very precocious, late into leaf and excellent kernel quality. Heaver cropping than Franquette & apparently Lara. Flowers start red fade to yellow and have good frost resistance.	Shows great potential in Northern Europe, new plantings still here and flowers late so pollination needs addressing.	Very Late	L 90%	N	Y	
Franquette	FR		Superb late season quality, large with a thin shell. Strong growing but late into leaf so avoiding frosts. Very pointed nut. Light cropping - for pollination	Reliable old variety, definately should be in any orchard for it's quality nut, Terminal bearer so no heavy pruning, needs room.	Very Late	T	P	Y	
Izvor 10	BU		Semi-upright tree, very cold tolerant. Excellent resistance to walnut anthracnose and walnut blight. Excellent tasting oblong nuts with a thin shell. Similar yield to Fernette.	Poor for us so far, we think it flowers too early or maybe just too young yet?	Mid	L 90%	N		Y
Jupiter	PO		Medium growing tree that is very fertile, high yield, large and grey-brown, good taste. Finely wrinkled shell. Mars good pollinator.	Good reliable cropper, good sized nut and the best of the Czech cultivars	Mid		Y	Y	
Lara	FR		Large vigorous tree, a heavy cropping large round walnut from the U.S.A. Excellent quality. Good quality kernel, cracks well and taste is good, good oil production.	Great cropper, susceptible to some blight so ensure ventilation.	Late	L 45%	Y	Y	
Mars	CZ		Medium sized tree, disease resistant and self-fertile producing large sweet nut, oval with pronounced tip, lightly wrinkled thin shell.	Pair with Jupiter, good nut maybe not as reliable a cropper as it's Czech partner but self-fertile and good option for small orchards	Mid	20% L	Y		
Milotai 10	HU		Big smooth round nut well filled, very high oil %, light yellow kernel with a good taste and high yielding. Medium early into leaf, vigorous tree.	Poor for us so far, we think it flowers too early or maybe just too young yet?	Early/mid	20-25% L	N	Y	Y
Parisienne	FR		Late leafing and flowering cultivar, similar timing to Franquette. Medium to large nut, maybe not reliable year on year?	Old french variety, good late leafing pollinator and cropper but maybe biennial in some sites.	Late			Y	
Plovdivski	BU		A Bulgarian variety for both fruit and timber. Large fruit and blight & Back Spot resistant. Great flavour, low yield, high kernel %. Medium to slow growth.	Too early for us, young trees but a good nut and others have a reasonable crop	Mid		P	Y	
Proslavski	BU		A Bulgarian variety, vigorous tall tree and blight resistant. Large thick shelled nut of good quality. Light cropper, good flavour big kernel % - Large nuts but unreliable cropper in maritime climates	Too early for us, young trees but a good nut and others have a reasonable crop	Mid		P	Y	
Red Danube (Geisenheim 1239)	AU	Y	Early Cropper, Large trees need room, some leaf spot?	Early bud break but pretty hardy and usually has nice deep red kernels, thick shell and doesn't crack and offer up kernel easily.	Early		P		
Ronde de Montignac	FR		One of the latest leafing and male flowering cultivars, pollinator for Fernor, Fernette, Franquette and later Chandler/Lara. Good disease resistance, medium sized nut and mostly self-fertile.	Old French variety and a pollinator for late flowering cultivars but does have a decent crop itself most years.	Very Late		Y		
Saturn	CZ		A fast growing medium sized tree, good cropper and very healthy tree, early into leaf so frost susceptible. Medium to large oval smooth thin shell with sweet nuts. Apollo is a good pollinator.	Great nut and good cropper if you don't have spring frosts very often	Very early		P	Y	
Sheinovo	BU		Vigorous spreading tree. Large oval thin shell with honey/straw coloured kernal, high oil content. Lower yield than Izvor 10. Good polliniser and partially self-fertile.	Good potential and a possible good pollinator (used in N.America), good nut but mid season bud break so time will tell.	Mid	25% L	P	Y	
Sieferdorfer (Sieferdorsky)	DE		Old Dresden DDR variety, early into leaf so frost susceptible,medium sized tree with good size round shelled smooth nut with great taste. High fat content?	Much too early into leaf for most of the UK, never seen a nut and we took all ours out	Very early		Y		
Sychrov	CZ		A walnut of excellent sweet flavour. Stunning pink to deep red kernels. Light crop, good flavour RED kernal in medium sized shell. Flowers closely to Sieferdorfer.	Earliest bud break of all walnuts, needs spring frost free area to get anything but irregular nuts.	Very early		N		Y
Tulare	USA		Self pollinating upright tree, modern cultivar. Has the enormous advantage of being self fertile, large nuts mature just before Franquette. Nuts are light in colour, large, round and well sealed	Should be good for the UK, good nut, new planting here and we think it's worth a try commercially. Early cropper.	Late	72%	Y	Y
